About API International.....	01.1
Overview and Services.....	01.2
Terms & Conditions of Sale.....	01.3
Flange Dimensional Tolerances.....	01.4
AWWA Flanges (C207/C228 Specifications).....	02.01
Class "B" Steel Ring Flanges (Series PF-B).....	02.02
Class "D" Steel Ring Flanges (Series PF-D).....	02.03-04
Class "D" Steel Overbore Ring Flanges (Series PFOB-D).....	02.05
Class "E" Steel Ring Flanges (Series PF-E).....	02.06
Class "E" Steel Overbore Ring Flanges (Series PFOB-E).....	02.07
Class "F" Steel Ring Flanges (Series PF-F).....	02.08
Class "B" Steel Blind Flanges (Series PFBL-B).....	02.09
Class "D" Steel Blind Flanges (Series PFBL-D).....	02.10
Class "E" Steel Blind Flanges (Series PFBL-E).....	02.11
Class "F" Steel Blind Flanges (Series PFBL-F).....	02.12
Class "D" Steel Hub Ring Flanges (Series PF-D-H).....	02.13
Class "E" Steel Hub Ring Flanges (Series PF-E-H).....	02.14
Class "SA" Stainless Steel Ring Flanges (Series SPF-A).....	02.15
Class "SB" Stainless Steel Ring Flanges (Series SPF-B).....	02.16
Class "SD" Stainless Steel Ring Flanges (Series SPF-D).....	02.17
Class "SE" Stainless Steel Ring Flanges (Series SPF-E).....	02.18
Class "SF" Stainless Steel Ring Flanges (Series SPF-F).....	02.19
Class "SA" Stainless Steel Blind Flanges (Series SPFBL-A).....	02.20
Class "SB" Stainless Steel Blind Flanges (Series SPFBL-B).....	02.21
Class "SD" Stainless Steel Blind Flanges 1986 (Series SPFBL-86).....	02.22
Class "SD" Stainless Steel Blind Flanges (Series SPFBL-D).....	02.23
Class "SE" Stainless Steel Blind Flanges (Series SPFBL-E).....	02.24
Class "SF" Stainless Steel Blind Flanges (Series SPFBL-F).....	02.25
Light Weight Flanges (½" & ⅝" Thick).....	03.1
½" Thick Steel Slip-on Flanges (Series PFH).....	03.2
½" Thick Thick Reducing Steel Flanges (Series PFHR).....	03.3
½" Thick Steel Slip-on Flanges for O.D. Tubing (Series PFH-16).....	03.4
½" Thick Steel Blind Flanges (Series PFBH).....	03.4
½" Thick Stainless Steel Flanges for Pipe (Series SPFH).....	03.5
½" Thick Stainless Steel Flanges for O.D tubing (Series SPFH-16).....	03.5
½" Thick Reducing Stainless Steel Flanges (Series SPFHR).....	03.6
½" Thick Stainless Steel Blind Flanges (Series SPFBH).....	03.7
⅝" Thick Steel Slip-on Flanges (Series PF-063).....	03.8
Miscellaneous Plate Flanges.....	04.1
Class 150 Steel Plate Flanges (Series PF).....	04.2
Butterfly Valve Adapter Flanges (Series 4020).....	04.4
ANSI/ASME B16.5 Forged Flanges Raised Face Flanges.....	05.01
Class 150 Forged Steel Flat Face Slip-on Flanges (Series FFS).....	05.02
Class 150 Forged Steel Raised Face Slip-on Flanges (Series RFS).....	05.03
Class 150 Forged Steel Raised Face Blind Flanges (Series RFB).....	05.04
Class 300 Forged Steel Raised Face Slip-on Flanges (Series RFS-30).....	05.05
Class 300 Forged Steel Raised Face Blind Flanges (Series RFB-30).....	05.06
Class 150 Forged Stainless Steel Raised Face Slip-on Flanges (Series SRFS).....	05.07
Class 150 Forged Stainless Steel Raised Face Blind Flanges (Series SRFB).....	05.08
Class 300 Forged Stainless Steel Raised Face Slip-on Flanges (Series SRFS-30).....	05.09
Class 300 Forged Stainless Steel Raised Face Blind Flanges (Series SRFB-30).....	05.10

Table of Contents - Continued

Exhaust Flanges.....	06.1
Round Exhaust Steel Flanges (Series PFE & SPFE).....	06.2
½" Thick Reducing Steel Flanges (Series PFHR).....	06.3
½" Thick Reducing Stainless Steel Flanges (Series SPFHR).....	06.4
Square Exhaust Steel Flanges (Series PFES).....	06.5
Backing Flanges & Stub Ends.....	07.1
Stainless Steel Backing Flanges for Angle Face Rings (Series SABF).....	07.2
Ductile Iron Backing Flanges for Stub Ends (Series BF).....	07.3
Stub Ends (Series SE).....	07.4
Valve Accessories.....	08.1
Valve Extensions for Butterfly Valves (Series VE).....	08.2
Rubber Expansion Joints & Accessories.....	09.1
Flanged Molded Rubber Expansion Joints (Series AMS, SAMS, AMT & SAMT).....	09.2-4
Flanged Molded Rubber Expansion Joints (Series AJS, SAJS, AJT & SAJT).....	09.5-7
Threaded Union Molded Rubber Expansion Joints (Series AMU).....	09.8
Threaded Union Molded Rubber Expansion Joints (Series AJU).....	09.9
Control Rod Units (Series CRU).....	09.10
Split Retaining Rings (Class 150) - Zinc Plated Steel & Stainless Steel (Series RR & SRR).....	09.11
Split Retaining Rings (Class 300) - Zinc Plated Steel (Series RR-30).....	09.12
Pump Connectors.....	10.1
Stainless Steel Braided - Flange x Flange (Series PCF).....	10.2
Stainless Steel Braided - Male x Male (Series PCT).....	10.2
Fittings & Accessories.....	11.1
Threaded Half Couplings (Series THC).....	11.2
Threaded Both End Nipples (Series TOE).....	11.3
Threaded Both End Nipples (Series TBE).....	11.4
304L Stainless Steel 90 Degree Long Radius Elbow (Series LRE).....	11.5
Gaskets (Series GNA & GRR).....	11.6-7
Hydraulic Motor Pump Brackets (Series HB).....	11.8
Exhaust Rain Caps (Series RC).....	11.9
KLAMPz Grooved Piping System (UL/FM).....	12.01
All Parts Overview.....	12.02
Pipe Size Reference Sheet.....	12.03
K05 Light Weight Flexible Coupling.....	12.04
K10 & K11 Elbows.....	12.05
K20 Tee.....	12.06
K41 Flange Adapter.....	12.07
K58 Adapter Nipples (ASTM A538).....	12.08
K58 Adapter Nipples (ASTM A312 304L/316L).....	12.09
K60 Grooved Cap.....	12.10
Gaskets (EPDM).....	12.11
Nuts & Bolts.....	12.12

Your source for flanges, pipe fittings, and custom solutions!

API International is your dedicated manufacturer and engineering solutions provider specializing in essential components - including flanges, expansion joints, valves, other pipe fittings, and custom fabricated parts. We proudly serve the Agriculture, Exhaust, HVAC, and Water Works industries. Our conveniently located warehouses ensure quick distribution throughout the United States, while our in-house Machine Shop is ready to modify stock items or produce custom products built precisely to your unique specifications.

API Headquarters - Office Building

Our goal is simple: to be the easiest company you work with. We back that promise by being quick to respond, keeping the right products in inventory, and taking full ownership of every order. When you call, a member of our large sales staff is always there to answer. We hold ourselves fully accountable for meeting every requirement and ensuring your order ships on time.

DC# 0925

Services

International Procurement

With over forty years of international business experience, we've built and maintained strong, established alliances with suppliers across Asia and Europe. Our dedicated overseas representatives continuously cultivate close partnerships within this network while aggressively source-finding to secure the very best options for our clients.

In addition, our international representatives live and work in the regions they service, providing them with expert command of local traditions, dialects, and acceptable business practices. By partnering with **API International** for your procurement needs, you get instant access to our proven knowledge base - the critical foundation for successfully conducting business in the global markets that supply your components.

Custom Fabrication

A core competency of **API International** is the fabrication of custom parts in a variety of alloys for our OEM customers. Our team works closely with our engineering department and select manufacturers, creating a seamless process to customize high-quality products built precisely for your unique requirements.

Logistics Services

API International's full-service logistics platform allows OEMs to maintain perfect inventory levels of quality-controlled custom parts that align precisely with their production timeline without worrying about when their custom parts will be available for use. We handle all logistical aspects, including: shipping, freight forwarding, customs clearing, local trucking, and material handling from

from our network of overseas manufacturers and facilities. We handle all of the pieces of the logistics puzzle, enabling our OEMs clients to maintain inventory levels of quality controlled products that match their production timeline.

To maximize efficiency, we offer total flexibility: You can utilize our warehouse space to inventory blanket orders, or we can ship containers directly to your manufacturing facility. For customers who prefer their own warehouse, we even customize box dimensions to match your rack specifications perfectly.

All statements made within our Website and Catalog falls under API International, Inc.'s **Standard Terms and Conditions**: <https://apiint.com/terms-and-conditions/>

Flange Dimensional Tolerances

OUTSIDE DIAMETER	For O.D. $\leq$ 24.00"	+0.125", -0.062"
	For O.D. $>$ 24.00"	+0.125", -0.125"
INSIDE DIAMETER	For I.D. $\leq$ 10.00"	+0.031", -0.000"
	For I.D. $>$ 10.00"	+0.062", -0.000"
CONTACT FACE DIAMETER	Raised Face	+0.015", -0.015"
DRILLING	Bolt Hole Diameter	+0.031", -0.031"
	Bolt Circle Diameter	+0.062", -0.062"
	Bolt Hole Spacing	+0.031", -0.031"
THICKNESS	For Nominal Size $\leq$ 18"	+0.125", -0.000"
	For Nominal Size $\geq$ 20"	+0.187", -0.000"

Notes:

- a. Steel material conforms to the requirements of AWWA C207 specifications. Other material is available upon request.
- b. Meets ASME/ANSI Class 150 bolt pattern.

Pressure Ratings: 175psi (4" - 12") 150psi (14" and larger) at atmospheric temperature.

ALL DIMENSIONS ARE IN INCHES UNLESS OTHERWISE STATED.

Notes:

- Steel material conforms to the requirements of AWWA C207 specifications. Other material is available upon request.
- Meets ASME/ANSI Class 150 bolt pattern.
- For flanges in smaller sizes see page 4.2.

Pressure Ratings: 275psi at atmospheric temperature.

ALL DIMENSIONS ARE IN INCHES UNLESS OTHERWISE STATED.

DC# 0925

Notes:

- Steel material conforms to the requirements of AWWA C207 specifications. Other material is available upon request.
- Meets ASME/ANSI Class 150 bolt pattern.
- AWWA recommends the use of Dish Assemblies for sizes above 72". Call API customer service for additional information.

Pressure Ratings: 86psi at atmospheric temperature.

ALL DIMENSIONS ARE IN INCHES UNLESS OTHERWISE STATED.

Notes:

- a. Steel material conforms to the requirements of AWWA C207 specifications. Other material is available upon request.
- b. Meets ASME/ANSI Class 150 bolt pattern.
- c. AWWA recommends the use of Dish Assemblies for sizes above 72". Call API customer service for additional information.

Pressure Ratings: 175psi (4" – 12") and 150psi (14" and larger) at atmospheric temperature.

ALL DIMENSIONS ARE IN INCHES UNLESS OTHERWISE STATED.

Notes:

- a. Steel material conforms to the requirements of AWWA C207 specifications. Other material is available upon request.
- b. Meets ASME/ANSI Class 150 bolt pattern.

Pressure Ratings: 275psi at atmospheric temperature.

ALL DIMENSIONS ARE IN INCHES UNLESS OTHERWISE STATED.

AWWA Class "SA" Stainless Steel-Ring Flanges [50psi]

SPF1400-A	14	21.00	14.19	18.75	1.125	12	0.625	31.3

Notes:

- All Stainless Steel flanges available in Dual Grade 304/304L or 316/316L.
Material conforms to the requirements of AWWA C228 specifications.
Other material is available upon request.
- Meets ASME/ANSI Class 150 bolt pattern.
- For flanges larger than 14" see AWWA Class "B"
- Class SB is being sold as the recommended product for sizes 10", 12", 14" and meet/exceed the required pressure ratings for Class SA
- Thickness Spec's (sizes 10", 12", 14"):
 - AWWA Class A requires minimum .625" (+.125;- .000).
 - AWWA Class B requires minimum .688" (.125;- .000).
- AWWA Class A acceptable thickness (sizes 10", 12", 14") : .625 -.750"

Pressure Ratings: 50psi at atmospheric temperature.

ALL DIMENSIONS ARE IN INCHES UNLESS OTHERWISE STATED.

Notes:

- All Stainless Steel flanges available in Dual Grade 304/304L or 316/316L.
Material conforms to the requirements of AWWA C228 specifications.
Other material is available upon request.
- Meets ASME/ANSI Class 150 bolt pattern.
- AWWA recommends the use of Dish Assemblies for sizes above 72". Call API customer service for additional information.

Pressure Ratings: 86psi at atmospheric temperature.

ALL DIMENSIONS ARE IN INCHES UNLESS OTHERWISE STATED.

AWWA Class "SD" Stainless Steel Blind Flanges - 1986 Spec's

Notes:

- a. All Stainless Steel flanges available in Dual Grade 304/304L or 316/316L.
- b. Meets ASME/ANSI Class 150 bolt pattern.

ALL DIMENSIONS ARE IN INCHES UNLESS OTHERWISE STATED.

5/8" Thick Class 150IPS Slip-on Flanges

Notes:

- Flange material is steel (to AWWA C207 specifications). Specific grades of steel for structural or critical applications are available upon request.
- Meets ASME/ANSI Class 150 bolt pattern.

ALL DIMENSIONS ARE IN INCHES UNLESS OTHERWISE STATED.

Notes:

- Dimensions and Tolerances per ASME/ANSI B16.5 Class 300.
- Material meets ASTM A105 Forged Steel requirements.
- Flanges are painted black.

ALL DIMENSIONS ARE IN INCHES UNLESS OTHERWISE STATED.

Notes:

- Flange material is steel (to AWWA C207-13 specifications). Specific grades of steel for structural or critical applications are available upon request.
- Meets ANSI Class 150 pattern

ALL DIMENSIONS ARE IN INCHES UNLESS OTHERWISE STATED.

PART NUMBER STRUCTURE

Part Number Section	Options
Category	SE = Stub End
Size	XXXX = Size in inches going out 2 decimal places
Type	C = Type C
Schedule	10S = Schedule 10
Material	304L = 304L Stainless Steel
Example	SE0100-C-10S-304L = 1" Stub End, Type C, Schedule 10, 10, 304L Stainless Steel

Notes:

- Product Specification For Lap Joint Type C MSS SP-43 Schedule 10S. Other Types, Schedules, and sizes available upon request.
- Standard material is 304L Stainless Steel, but available in other materials on request.

ALL DIMENSIONS ARE IN INCHES UNLESS OTHERWISE STATED.

Valve Accessories

Valve Extensions (For Butterfly Valves)

FEATURES

- Valve extensions can be used for underground service or in riser systems to enable easier access for opening and shutting butterfly valves.
- Galvanized steel for excellent corrosion resistance.

ALL DIMENSIONS ARE IN INCHES UNLESS OTHERWISE STATED.

VEIS1012D-XX	10	0.866
VEIS1012D-XX	12	0.866

Housing Information (VEH)

Housing Part Number	Size	Bolt Circle Diameter (Øb)
VEHS-XX	4	2.76
VEHS-XX	5	2.76
VEHS-XX	6	2.76
VEHL-XX	8	4.02
VEHL-XX	10	4.02
VEHL-XX	12	4.02

Note:

- "XX" = Length of Valve Extension (36", 48", or 72").
- Valve extensions are for BVL and BVG product lines.

Rubber Expansion Joints & Accessories

Rubber Expansion Joints - *Flange x Flange*

For Series: AMS, AMT, SAMS, & SAMT

PART NUMBER STRUCTURE

Part Number Section	Options
Type	AMS = Single Sphere (Steel) SAMS = Single Sphere (Stainless Steel) AMT = Twin Sphere (Steel) SAMT = Twin Sphere (Stainless Steel)
Size	XXXX = Size in inches going out 2 decimal places
Body Material	NE = Neoprene EP = EPDM BN = Buna-N/Nitrile/NBR
Flange Material	STL = Zinc Plated Steel 304L = 304L Stainless Steel 316L = 316L Stainless Steel
Class	150 = 150# Drilling 300 = 300# Drilling PXX = DIN PN10/PN16Drilling (available upon request)
Example	AJS0200-NE-STL-150 = Single Sphere Expansion Joint with Neoprene Body and Steel Flanges with 150# Drill Pattern

OPERATING CONDITIONS

Size Range	1" - 12"	14" - 24"
Operating Pressure*	up to 214 psi	up to 114 psi
Operating Temp Range*	14 °F- 170 °F (Neoprene) 14 °F- 210 °F (EPDM) 14 °F- 170 °F (Buna-N/Nitrile/NBR)	
Burst Pressure	853 psi	340 psi
Vacuum Rating*	Contact API Sales	

MATERIALS

Part	Part Description	Material
1	Flanges	Mild Steel - Zinc Plated steel or Stainless Steel
2	Reinforcing Wire	Mild Steel
3	Tube	Synthetic Rubber
4	Cover	Synthetic Rubber
5	Reinforcing Cord	Synthetic Fiber

“*” - Warnings:

- Pressure ratings listed in the above table are for temperatures up to 110 °F. For temperature service above 125 °F, please contact API Sales for actual working pressure ratings.
- Limit rods are required in systems that are unanchored and recommended in all other applications.
- Not for use in steam applications

Single Sphere Rubber Expansion Joints - *Flange x Flange* (AMS & SAMS Series)

FEATURES

- Applicable for suction and delivery (discharge).
- Meets the requirements for low lead per NSF/ANSI 372
- Provides sound and vibration isolation.
- Gaskets and packing are not required.
- Floating flanges allow for easy installation.
- Prevents piping system and equipment breakdown by absorbing elongation and contraction caused by temperature variances.
- Absorbs water pulsation and minimizes water hammering.
- DIN drilled flanges available upon request (See DIN Flange section for dimensions)

APPLICATIONS

- Pumps & air compressors in air conditioning system & sanitary equipment.
- Refrigeration systems and blowers in industrial plant equipment.
- Feed-water and drainage equipment in marine piping systems.
- Applicable for use in power generation and chemical plants.

DIMENSION & ALLOWABLE MOVEMENTS

ALL DIMENSIONS ARE IN INCHES UNLESS OTHERWISE STATED.

(S)AMS2400	24	10	0.75	0.50	0.75	15°	0.13	0.13	0.13	5°

Warning: Do not elongate rubber expansion joints when installing for suction service. “**” - Non Concurrent Ratings.

Notes:

- For all expansion joint configurations - See section 10.02

Twin Sphere Rubber Expansion Joints - *Flange x Flange* (AMT & SAMT Series)

FEATURES

- Applicable for suction and delivery (discharge).
- Meets the requirements for low lead per NSF/ANSI 372
- Designed for greater compression, elongation, and angular movement than the single sphere expansion joint.
- Excellent for absorbing thermal expansion and eliminating sound and vibration.
- Gaskets and packing not required.
- Good electrical insulator.
- Absorbs water pulsation and minimizes water hammering.
- DIN drilled flanges available upon request (See DIN Flange section for dimensions)

APPLICATIONS

- Pressure piping systems in building equipment and general industrial plants.
- Pump and turbine lines used for power generation plants, industrial machinery and universal pump blowers.
- Feed-water & drainage lines for waterworks & sanitary piping systems.
- Pipelines for industrial plants and shipbuilding yards.

Class	150 = 150# Drilling 300 = 300# Drilling PXX = DIN PN10/PN16Drilling (available upon request)
Example	AJS0200-NE-STL-150 = Single Sphere Expansion Joint with Neoprene Body and Steel Flanges with 150# Drill Pattern

OPERATING CONDITIONS

Size Range	1" - 12"	14" - 24"
Operating Pressure*	225 psi (up to 160 °F)	150 psi (up to 160 °F)
Burst Pressure	900 psi (at 70 °F)	600 psi (at 70 °F)
Vacuum Rating*	26 in/hg	15 in/hg
Operating Temp Range*	14 °F- 180 °F (Neoprene) 14 °F- 210 °F (EPDM) 14 °F- 180 °F (Buna-N/Nitrile/NBR)	

MATERIALS

Part	Part Description	Material
1	Flanges	Mild Steel - Zinc Plated steel or Stainless Steel
2	Reinforcing Wire	Mild Steel
3	Tube	Synthetic Rubber
4	Cover	Synthetic Rubber
5	Reinforcing Cord	Nylon

“*” - Warnings:

- Pressure ratings listed in the above table are for temperatures up to 160 °F. For temperature service above 160 °F, please contact API Sales for actual working pressure ratings.
- Limit rods are required in systems that are unanchored and recommended in all other applications.
- Not for use in steam applications

Single Sphere Rubber Expansion Joints - *Flange x Flange* (AJS & SAJS Series)

FEATURES

- Applicable for suction and delivery (discharge).
- Meets the requirements for low lead per NSF/ANSI 372
- Provides sound and vibration isolation.
- Gaskets and packing are not required.
- Floating flanges allow for easy installation.
- Prevents piping system and equipment breakdown by absorbing elongation and contraction caused by temperature variances.
- Absorbs water pulsation and minimizes water hammering.
- DIN drilled flanges available upon request (See DIN Flange section for dimensions).
- Working pressure ratings based on 4:1 safety margin (at 70° F).

APPLICATIONS

- Pumps & air compressors in air conditioning system & sanitary equipment.
- Refrigeration systems and blowers in industrial plant equipment.
- Feed-water and drainage equipment in marine piping systems.
- Applicable for use in power generation and chemical plants.

Warning: Do not elongate rubber expansion joints when installing for suction service.

“*”— Sizes ≤ 2" do not have root rings.

“**”— Non Concurrent Ratings.

Notes:

- For all expansion joint configurations - See section 10.05

Twin Sphere Rubber Expansion Joints - *Union x Union* (AMU Series)

FEATURES

- Efficient noise and vibration isolation.
- Ability to absorb large displacement due to eccentric, axial, and angular movement.
- Applicable for both suction and discharge.
- Female Threaded Unions allow for easy installation.

APPLICATIONS

- Vibration isolation for small pumps and circular pumps.
- Sewage disposal purifier line.
- Vibration isolation for air-conditioners and pipes.

DIMENSION & ALLOWABLE MOVEMENTS

ALL DIMENSIONS ARE IN INCHES UNLESS OTHERWISE STATED.

Warning: Do not elongate rubber expansion joints when installing for suction service. “*” - Non Concurrent Ratings.

PART NUMBER STRUCTURE

Part Number Section	Options
Type	AMU = Twin Sphere Union Expansion Joint
Size	XXXX = Size in inches going out 2 decimal places
Body Material *Denoted with "XX"	EP = EPDM NE = Neoprene

OPERATING CONDITIONS

Operating Pressure	up to 150 psi
Normal Operating Temp.	14° - 158° F
Vacuum Rating	25" Hg
Burst Pressure	750 psi

MATERIALS

Part	Part Description	Material
1	Threaded Union	Malleable Iron (Hot Dipped Galv.)
2	Reinforcing Cloth	Nylon Fabric
3	Elastomer	EPDM

“*” - Warning:

Pressure ratings listed in the above table are for up to 110° F (for Neoprene), and 125° F (for EPDM).

For elevated temperature service, please contact API Sales for actual working pressure ratings.

Twin Sphere Rubber Expansion Joints - *Union x Union* (AJU Series)

FEATURES

- Efficient noise and vibration isolation.
- Ability to absorb large displacement due to eccentric, axial, and angular movement.
- Applicable for both suction and discharge.
- Female Threaded Unions allow for easy installation.

APPLICATIONS

- Vibration isolation for small pumps and circular pumps.
- Sewage disposal purifier line.
- Vibration isolation for air-conditioners and pipes.

Warning: Do not elongate expansion joints when installing for suction service.

"*" - Complete units consist of the following: 2 Rods; 4 Plates; 8 Nuts; 8 Steel Washers; & 8 Neoprene Washers.

If needed, 3 or more rod sets are available upon request.

"**" - Single (S); Twin (T).

NOTES:

- Available in ANSI Class 150 and 300 drilling pattern.
- Available in plated mild steel, 304, and 316 stainless steel.

Split Retaining Rings - Class 150 Drill Pattern

1 Set = 4 Split Ring Halves (thru 28")
8 Split Ring Quarters (for 30" and larger)

Notes:

- a. Available in Silver Zinc Plated Steel, Straight Grade 304 Stainless Steel, and Dual Grade 316/316L Stainless Steel.
b. Navy or DIN drilling available on special order basis.

ALL DIMENSIONS ARE IN INCHES UNLESS OTHERWISE STATED.

Notes:

- Pump Connectors are designed to absorb pump vibration, plus 1/8" misalignment.
- Working pressures are based on simple pump vibration in a static installation and may vary based on specific application.
- Threads on PCT series Pump Connectors are Male x Male NPT.
- For elevated temperature service (above 250°F.) please contact API Sales for actual working pressure ratings.
- All flanged Pump Connectors have a 150# drilling pattern.

Note:

- Dimensions per ANSI B 16.5 and AWWA C110 standards for pipe flanges and gaskets.
- Dimensional tolerances (unless otherwise stated): Up to 1" @ +/- .0325"; 1.25" thru 12" @ +/- .0625"; 14" thru 24" @ +/- .0975"; 26" and above @ +/- .25".
- Standard gasket material is SBR (Red Rubber) or Non-Asbestos (Green), but Neoprene, EPDM, Buna N, Silicone, Viton Teflon and other compounds are readily available.
- Standard thicknesses are 1/16" and 1/8", but other thickness are available.
- Sizes above 24" available upon request (minimum order quantity may apply).

ALL DIMENSIONS ARE IN INCHES UNLESS OTHERWISE STATED.

Gaskets - Basic Compounds & Properties

				General Chemical Resistance	
Common Name (s)	Designation	Composition	General Properties	Resistance to	Attacked by:
Neoprene	CR	Chloroprene	Good weathering resistance and flame retarding. Good resistance to petroleum based fluids.	Moderate chemicals and acids, ozone, oils, fats, greases and many solvents.	Strong oxidizing acids, esters, ketones, chlorinated, aromatic and nitro hydrocarbons.
EPDM	EPM	Ethylene-propylene-diene-molimers	Excellent ozone, chemical and aging resistance. Excellent heat resistance. Poor resistance to petroleum based fluids.	Heat, ozone, strong oxidizing chemicals and acetone.	Petroleum based fluids, animal fats, solvents and greases.
Buna-N	NBR	Nitrile-butadiene	Excellent resistance to petroleum based fluids. Good physical properties.	Many hydrocarbons, fats, oils, hydraulic fluids and chemicals.	Ozone (except PVC blends), ketones, esters, aldehydes, chlorinated and nitro hydrocarbons.
Silicones	Q, Si	Polysiloxane	Excellent high and low temperature properties. Good oil resistance. FDA compound. Good physical properties.	Moderate chemicals and acids, ozone, oils, fats, greases and concentrated sodium hydroxide.	Many solvents, high aromatic hydrocarbons, concentrated acids, dilute sodium hydroxide.
SBR (Red Rubber)	SBR	Styrene- butadiene	Good physical properties and abrasion resistance. Poor resistance to petroleum based fluids.	Most moderate chemicals wet or dry, organic acids, alcohols, ketones and aldehydes.	Ozone, strong acids, animal fats, oils, greases and most hydrocarbons.
Viton (Flouro-elastomer)	FPM	Hexafluoropropylene-vinylidene flouride	Excellent oil and air resistance at low and high temperatures. Excellent chemical resistance.	All aliphatic, aromatic and halogenated hydrocarbons, acids, animal and vegetable oils.	Ketones, low molecular weight esters and nitro containing compounds
Teflon® (Flourocarbon resin)	TFE	Polytetra-flouroethylene	Excellent chemical and solvent resistance. Resistant to very high temperatures.	Inert to most chemicals, smooth anti-adhesive surface. Easily cleaned.	Acetates, NA-K and some amino acids.
Non-Asbestos	NA	Aramid fiber and synthetic fibers bonded with NBR.	General service water & oil gasket. Pressures to 1595 psi, Temp to 750o F.	Mild acids, Alkalis, Oils, general chemicals & petroleum derivatives and steam.	Consult customer service for chemical compatibility.

Notes:

- The chemical guidelines in this table are offered as a general indication of the compatibility of various materials with chemicals and fluids listed.
- When in doubt a sample of the compound should always be tested with the particular chemical it is to handle.
- API stocks Non-Asbestos (GNA Series) and SBR (GRR Series) gaskets, but others are available upon request (minimum order quantity may apply).

PART NUMBER STRUCTURE

Part Number Section	Options
Material	GNA = Green Non-Asbestos GRR = Red Rubber
Size	XXXX = Size in inches going out 2 decimal places
Type	FF = Full Face R = Ring
Thickness	XXX = Size in inches going out 3 decimal paces

"x" = **G** (Electro-Galvanized/Zink-Plated Q235 Steel)
S (304 Stainless Steel)

TEMPERATURE RATINGS

Electro-Galvanized/ Zink-Plated Q235 Steel	750° F
304 Stainless Steel	1100° F

APPLICATIONS

- Used to prevent dirt, dust, rain and other debris from falling into exposed stack pipes

Notes:

- Rain Caps rated for 2,000,000 cycles.
- Listed "SIZE" correlates to OD of pipe, **NOT** NPS

AVAILABLE IN:

- **UL/FM APPROVED**
- **NON-UL/FM VERSION**

ALL DIMENSIONS ARE IN INCHES UNLESS OTHERWISE STATED.

- 1) Flexible Couplings in straight runs should be supported as close to the coupling as possible, or within the distance.
- 2) Flexible couplings provide either axial or longitudinal movement. The available movement for roll-grooved joints is 1/2 of cut-groove dimensions per ANSI/AWWA C606-06.
- 3) When pre-setting power nut-drivers, the following torque should not be exceeded. Excessive tightening of the nuts could result in joint failure. (Values Ft-Lbs.) 0.375"= 50-59 ; 0.5"=81-92 ; 0.625"= 147-190; 0.75"=177-179; 0.875"=202-221.
- 4) The standard finish is Epoxy Powder Coat, but other finishes are available upon request, including Paint, Dacromet and Hot-Dip Galvanized.
- 5) Compatible with KLAMPz KGE product line.

WARRANTY**KLAMPz[®]****Grooved Piping System**

We warrant all KLAMPz products to be free from defects in materials and workmanship under normal conditions of use and service. Our obligation under this warranty is limited to repairing or replacing at our option at our factory or designated facility any product which shall within **one year** after delivery to the original buyer be returned with transportation charges prepaid, and which our examination and inspection shall show to our satisfaction to have been defective.

This warranty is made expressly in lieu of any other warranties, express or implied, including any implied warranty of merchantability or fitness for particular purpose. The buyer's sole and exclusive remedy shall be for the replacement or repair of defective products as provided herein. The buyer agrees that no other remedy (including but not limited to, incidental or consequential damages for lost profits, lost sales, injury to person or property or any other incidental or consequential loss) shall be available to him/her.

KLAMPz neither assumes nor authorizes any person to assume for it any other liability in connection with the sale of such products.

This warranty shall not apply to any product which has been the subject to misuse, negligence or accident, which has been repaired or altered in any manner outside of KLAMPz factory or designated facility or which has been used in manner contrary to KLAMPz instructions, recommendations or generally accepted practices. KLAMPz shall not be responsible for design errors due to inaccurate or incomplete information supplied by the buyer or his representatives.

2 YEAR
Warranty

Machining Services

Machining Services - Features & Capabilities

Our machine shop enables API International to manufacture product that meets a wide variety of specifications utilizing Buy America, AIS or Import materials. We also support fast turn modifications to our stock items in order to meet customer needs. Whether you have a CAD drawing or sample that needs to be reverse engineered, we can work with you on prototyping, production quantity manufacturing and even warehousing product.

MILLING

- Variety of 3-axis vertical mills allows efficient machining of your part
- Open work envelope of 4-axis horizontal Boring Mill allows machining of parts up to 59"(X) x 39"(Y) x 29"(Z) in size, with the ability to work with larger parts by repositioning

TURNING

- Versatile array of lathes can handle your small to medium size parts
- CNC lathes with the ability to turn parts with diameters from 3" to 43"
- Selection of manual lathes supports a turning range of 3" to 108" (120" when ID $\geq$ 24")

OUR ADVANTAGE

Range of Capabilities:

Experience with a wide variety of products, sizes, materials and specifications.

Quality Control:

Quality control technicians working with modern technology, including a Romer Arm CMM, that verifies all products meet customer requirements.

Quick Turnaround:

Short lead times that allow you to get products to customers when they need them.

Cost Reduction:

Our machine shop's vast knowledge of tooling and fixturing can help reduce your production cost, especially on your high volume products.

MATERIAL

- Plastic:
 - Delrin, POM, Lexan, Nylon 66, Nylon 6, PEEK, PP, PE, Acetal
- Rubber:
 - EPDM, Neoprene, Buna-N, Viton
- Aluminum:
 - A2011, A2024, A2017, A5052, A5056, A6061, A6063, A6463, A6082, A7075
- Copper:
 - 3600, 3604, 3771
- Titanium:
 - 1-28
- Steel Series:
 - Ductile Iron:
 - ASTM A536
 - Carbon/Mild Steel:
 - A105, A36, A516-70, A572-50, etc.
 - Stainless Steel:
 - 300 Series- 303, 304, 304L, 316, 316L
 - 400 Series- 420J2, 430, 434, 442
- Special Metals:
 - Hastelloy, Inconel, Incoloy, Duplex 2205, Super Duplex 2507, Chrome Steel, alloys, or their equivalents

*Tooling can be added quickly in order to work with almost any material.

TOLERANCES

Part Size (max)	Tolerance
21"	$\pm .001$

Ideal for: Precision drilling & milling

BULLARD DYNATROL

- VERTICAL TURRET LATHE

Maximum turning diameter: 108" Ideal for: Turning rings and flanges with 42" to 108" outer diameters

Machining Services - Machines

MONARCH 96" VMC-RT
- CNC DRILLING MACHINE

Drill holes 0.25" - 3" diameter
Work piece: 20" - 108" diameter
Ideal for: Drilling bolt holes

QUICKDRILL GANTRY MACHINING CENTER -
HORIZONTAL CNC MILL

120" x 120" work envelope
Ideal for: Drilling and milling large
8" thick flanges up to 18ft in
diameter

DOOSAN PUMA 480/GT3100
- HORIZONTAL CNC LATHES

Maximum turning diameter: .5" x 21.5"
Maximum length of work: 39"
Ideal for: High volume turning of
complex parts

SENFENG SF1500HC
- FIBER LASER

Ideal for: Rust removal, paint removal,
grease removal, weld cleaning

FRYER VT-80
- VERTICAL TURRET LATHE

Max Cutting Length 32"
Cutting Diameter Range 30" - 76"
Ideal for: High volume turning of complex
parts up to 80" diameter

Rubber Expansion Joints

Installation Guide

Installation Instructions

Series AMS/AMT/AJS/AJT Expansion Joints

PREPARATION

1. **Check Application Criteria.** Double-check the performance limits of the expansion joint against the anticipated operating conditions. Expansion joints should never be subjected to operating conditions beyond the temperature, pressure, and/or vacuum service recommendations of API International. If the total motions due to initial installation and the movements of pipelines during system operation exceed the published maximum allowable movement, then the pipeline should be altered to reduce the initial installation movements. Also, the line should be anchored to EJMA (Expansion Joint Manufacturers Association) specifications to limit the pipe movements that the expansion joint must absorb. For elevated temperatures (above 110° F), contact API Sales for maximum operating pressures.
2. **Check Location.** Generally, the proper location of rubber expansion joints is installed close to a main anchor point. Following the joint in the line, a pipe guide, or series of guides, should be installed to keep the pipe aligned and prevent undue displacement (of the pipe).
3. **Check Expansion Joint.** Check the interior, exterior cover, and rubber beaded faces for damage or cracks prior to placing into service. The exterior cover is designed to keep harmful material from penetrating the carcass of the joint.
4. **Check Alignment.** Expansion joints are not designed to make up for piping misalignment errors and should be no greater than 1/8" in any direction. Misalignment of an installed expansion joint reduces the rated movements and can induce severe stress of the material properties, thus causing reduced service life and premature failure.
5. **Check Support.** Piping must be supported by hangers or anchors, so that its weight is not carried by the expansion joint.
6. **Check Mating Flanges.** Be sure that companion flanges to be mated with the flanges of the expansion joint are clean. Used parts should be carefully examined for reasonable smoothness, and any adhering particles of old gasket or other foreign material should be scraped off, taking care not to gouge or mutilate the flange surface. When attaching expansion joints to raised-face flanges, the use of composite gaskets are required to prevent metal flange faces from cutting the rubber bead during installation/operation.

Note: Never install expansion joints next to wafer type check or butterfly valves. Serious damage to the rubber beaded face can result due to the lack of flange mating surface and/or bolt connection.

WARNING: Expansion joints may operate in pipelines or equipment carrying fluids and/or gases at elevated temperatures and elevated pressures and may transport hazardous materials. Precaution should be taken to periodically inspect the joints and protect personnel in the event of leakage or splash. Rubber expansion joints should not be installed in areas where inspection is not possible.

Note: Some of this information has been replicated from the "Fluid Sealing Association Handbook" on Non-Metallic Expansion Joints.

DC# 0925

Installation Instructions

Series AMS/AMT/AJS/AJT Expansion Joints

INSTALLATION

Apply Lubricant. Expansion joints rubber beaded faces may be painted with a solution of graphite in water or glycerin to prevent adherence of joint to pipe flanges. Petroleum lubricants should not be used.

Insert Expansion Joints into Position. For flat-face mating flanges, gaskets are not required. If using raised-face mating flanges, use composite gaskets to prevent raised-face protrusion from cutting the rubber bead during installation/operation. Care must be taken when pushing the joint into the breach between the mating flanges so as not to roll the leading edge of the joint out of its flange groove. Do not bolt directly to another component with an elastomeric face or to a specialty flange without inserting a solid full-face metallic gasket.

Insert Bolts. Bolts should be inserted from the arch side (so that bolt heads are adjacent to arch) to ensure that bolts do not interfere with arch during periods of compression.

Tighten Bolts. Tighten all bolts in stages (gradually and equally) by alternating around the flange in a diagonal manner to the recommended torque values listed below. If a water-tight seal is not achieved after the final tightening (step 3), slightly tighten the nuts until leak is sealed¹. Do not over-tighten to the point where there is metal to metal contact between the rotating flange and the pipe flange². Check bolt tightness at least 24 hours after the system is started up, again after one week, and periodically every few weeks thereafter. As any rubber-like material takes a "set" after a period of compression, the bolts may loosen and result in a broken seal. In a hot and cold-water system, the bolts should be checked before changing from one medium to another.

RECOMMENDED BOLTING TORQUE* (AMS/AMT/AJS/AJT Series):

Size	Step 1 Torque FT-LBS	Step 1 Rest Period	Step 2 Torque FT-LBS	Step 2 Rest Period	Step 3 (Final) Torque FT-LBS
1" - 2"	20	30 Min	30	60 Min	30-45
2.5"	20	30 Min	35	60 Min	40-60
3" - 5"	25	30 Min	45	60 Min	45-60
6" - 8"	30	30 Min	50	60 Min	50-65
10" - 12"	30	30 Min	50	60 Min	55-80
14" - 16"	30	30 Min	55	60 Min	60-80
18"	30	30 Min	60	60 Min	70-90
20"	30	30 Min	65	60 Min	75-95
24"	30	30 Min	65	60 Min	80-100

Bolt Tightening - Add'l Notes:

1. Never attempt to tighten bolts while system is under pressure. All pressure must be relieved before attempting to tighten/re-tighten bolts.

2. Over compressing/crushing the rubber sealing bead to metal-to-metal contact between expansion joint flange & mating flange will result in premature failure.

"*" - Recommended Torque values are for reference only and may require more or less torque due to flange facing and other variables.

WARNING: Expansion joints may operate in pipelines or equipment carrying fluids and/or gases at elevated temperatures and elevated pressures and may transport hazardous materials. Precaution should be taken to periodically inspect the joints and protect personnel in the event of leakage or splash. Rubber expansion joints should not be installed in areas where inspection is not possible.

Note: Some of this information has been replicated from the "Fluid Sealing Association Handbook" on Non-Metallic Expansion Joints.

DC# 0825

Installation Instructions

Series AMS/AMT/AJS/AJT Expansion Joints

INSTALLATION - Continued

Control Rods.

For piping systems that are not anchored, control rods must be used. Control rods are always recommended as a safety precaution (even when the system is properly anchored and guided). Insulation over a non-metallic rubber expansion joint is not recommended.

Additional Tips.

Insulation over a non-metallic rubber expansion joint is not recommended, however if required, it should be made removable to permit easy access for periodic inspection of body and flange area when necessary.

Do not weld in the vicinity of a non-metallic expansion joint.

If the expansion joint is to be installed outdoors, appropriate outer cover material must be used to withstand the ozone, sunlight...etc.

Correct vs Incorrect Installation Tips.

Correct Installations

Incorrect Installations

WARNING: Expansion joints may operate in pipelines or equipment carrying fluids and/or gases at elevated temperatures and elevated pressures and may transport hazardous materials. Precaution should be taken to periodically inspect the joints and protect personnel in the event of leakage or splash. Rubber expansion joints should not be installed in areas where inspection is not possible.

Note: Some of this information has been replicated from the "Fluid Sealing Association Handbook" on Non-Metallic Expansion Joints.
