

CUSTOM MACHINING & MANUFACTURING

Our machine shop enables API to manufacture products that meet a wide variety of specifications utilizing AIS and Import materials. We also offer custom parts and assemblies for OEM Manufacturers in industrial industries.

We also support fast-turn modifications to our stock items to meet customer needs. Whether you have a CAD drawing or sample that needs reverse engineering, we can work with you on prototyping, production quantity manufacturing, and warehousing products.

OUR ROLE IN INDUSTRIAL

API is committed to providing high-quality flanges, valves, related products, and assemblies to a worldwide base of manufacturers and fabricators of commercial and industrial systems.

We stock parts in our conveniently located warehouses located in Oregon and Indiana to ensure quick distribution throughout the United States.

API will work with customers through their projects' development and fulfillment phases to optimize design, quality, functionality, manufacturability, cost, and customer satisfaction.

We manufacture a diverse selection of custom parts and assemblies for OEM Manufacturers in industrial industries. Contact us to get started on your next project!
