CUSTOMER FEEDBACK

"API International has been a game-changer for us. Their ability to keep critical inventory on hand and deliver quickly has saved us time, money, and headaches. We trust API to help us keep our operations running smoothly."

API International is a manufacturer and engineering solutions provider specializing in flanges, expansion joints, valves, other pipe fittings and custom fabricated parts. Customers turn to us when project deadlines are tight, parts are hard to find, and they need fast shipping plus expert support to keep their operations on track.

CHALLENGES

Before working with API International, the client often faced unreliable supply chains and inconsistent product availability, which made it difficult to keep projects on schedule. Parts from other vendors sometimes arrived late or did not meet the required specifications, which caused delays in the field and added pressure to meet demanding customer timelines. These challenges made it clear that Trojan needed a dependable partner who could consistently deliver the right products when they were needed most.

SOLUTIONS

Through this partnership, the client experienced a noticeable improvement in efficiency and reliability. Projects were able to move forward without the same level of interruption from missing or mismatched parts. The reduction in last-minute scrambling for critical components also helped improve overall customer satisfaction, since operations ran more smoothly and on schedule. The client has a dedicated sales rep who can provide rapid quotes and clear status updates, ensuring field teams know exactly what is arriving and when.

RESULTS

1

PRODUCTS DELIVERED ON TIME

Products in stock + shipping met field schedules.

2

ORDERS ARRIVED ON SPEC

Parts consistently match drawings and pressure classes.

3

FEWER RUSH PURCHASES

Less scrambling and fewer premium freight charges.

4

BETTER STATUS VISIBILITY

Proactive updates and accurate ETAs.

5

SMOOTHER OPERATIONS

Operations ran smoother with one trusted source.
