EXPANSION JOINTS

Suitable for suction and delivery applications, Twin-Sphere Molded Rubber Expansion Joints reduce noise and vibrations. These molded rubber expansion joints can absorb motion and reduce stress. They come with ANSI Class #150 drilled flanges and can be customized with ANSI Class #300 and DIN-rated flanges.

FEATURES

- Applicable for suction and delivery (discharge).
- Provides sound and vibration isolation.
- Gaskets and packing are not required. Floating flanges allow for easy installation.
- Prevents piping system and equipment breakdown by absorbing elongation and contraction caused by temperature variances.
- Absorbs water pulsation and minimizes water hammering.
- DIN drilled flanges available upon request (See DIN Flange section for dimensions).
- Working pressure ratings based on 4:1 safety margin (at 70°F).
